EXECUTIVE TECHNICAL PROFILE

Systems engineer and DevOps specialist with 8+ years of experience designing, deploying, and maintaining production-grade web and network infrastructure. Lead developer of multiple institutional platforms and currently architecting AI focussed systems. Experienced in Linux server administration, CI/CD automation, database systems.

EXPERIENCE

Institute for Scientific & Technological Information, Accra — Snr. Technical Officer

MAR 2019 - PRESENT

- Architected and deployed 6+ institutional web platforms serving research and agricultural data systems.
- Designed and managed CI/CD pipelines for multi-project deployments with source code management via github
- Administer Linux-based production servers (Proxmox).
- Provide infrastructure monitoring, backup strategies, and system hardening.

La Dade-Kotopon Mun. Assembly, La — IT Officer

MAY 2015 - MAR 2019

- Managed municipal network infrastructure (LAN/WAN, routers, switches).
- Provided system troubleshooting across multi-user environments.
- Implemented network maintenance and hardware lifecycle planning.

EDUCATION

**Kwame Nkrumah University of
Science & Technology** — MSc. IT

Nov 2025

**Ghana Technology University
College, Tesano** — BSc. IT

Nov 2013

TECHNICAL EXPERTISE

Programming & Development
- PHP, Python, MariaDB

DevOps & Infrastructure
- Linux Serv. Admin, Git, CI/CD

Network & Systems

- Infrastructure Monitoring

PROJECTS

Report Management System:
Secure, role-based reporting
platform with workflow
automation and Linux
production deployment.
[\[Internal App\]](#)

CSIRSpace: Institutional
digital repository with
optimized database, server
configuration, and reliability
management.

AgHub: Full-stack agricultural
data platform deployed for
bandwidth-constrained
environments.

CSIR eLearning: Multi-user
eLearning system with CI/CD
workflows, performance
tuning, and server
administration.
